

● GLOBAL CLOUD INTELLIGENCE

AZURE INFRA WORLD MAP

A real-time command center that renders
your entire Azure estate – cost,
security, health, governance and
reliability – live on a single globe.

READ-ONLY

100% LIVE DATA

8 REGIONS · 408 RESOURCES

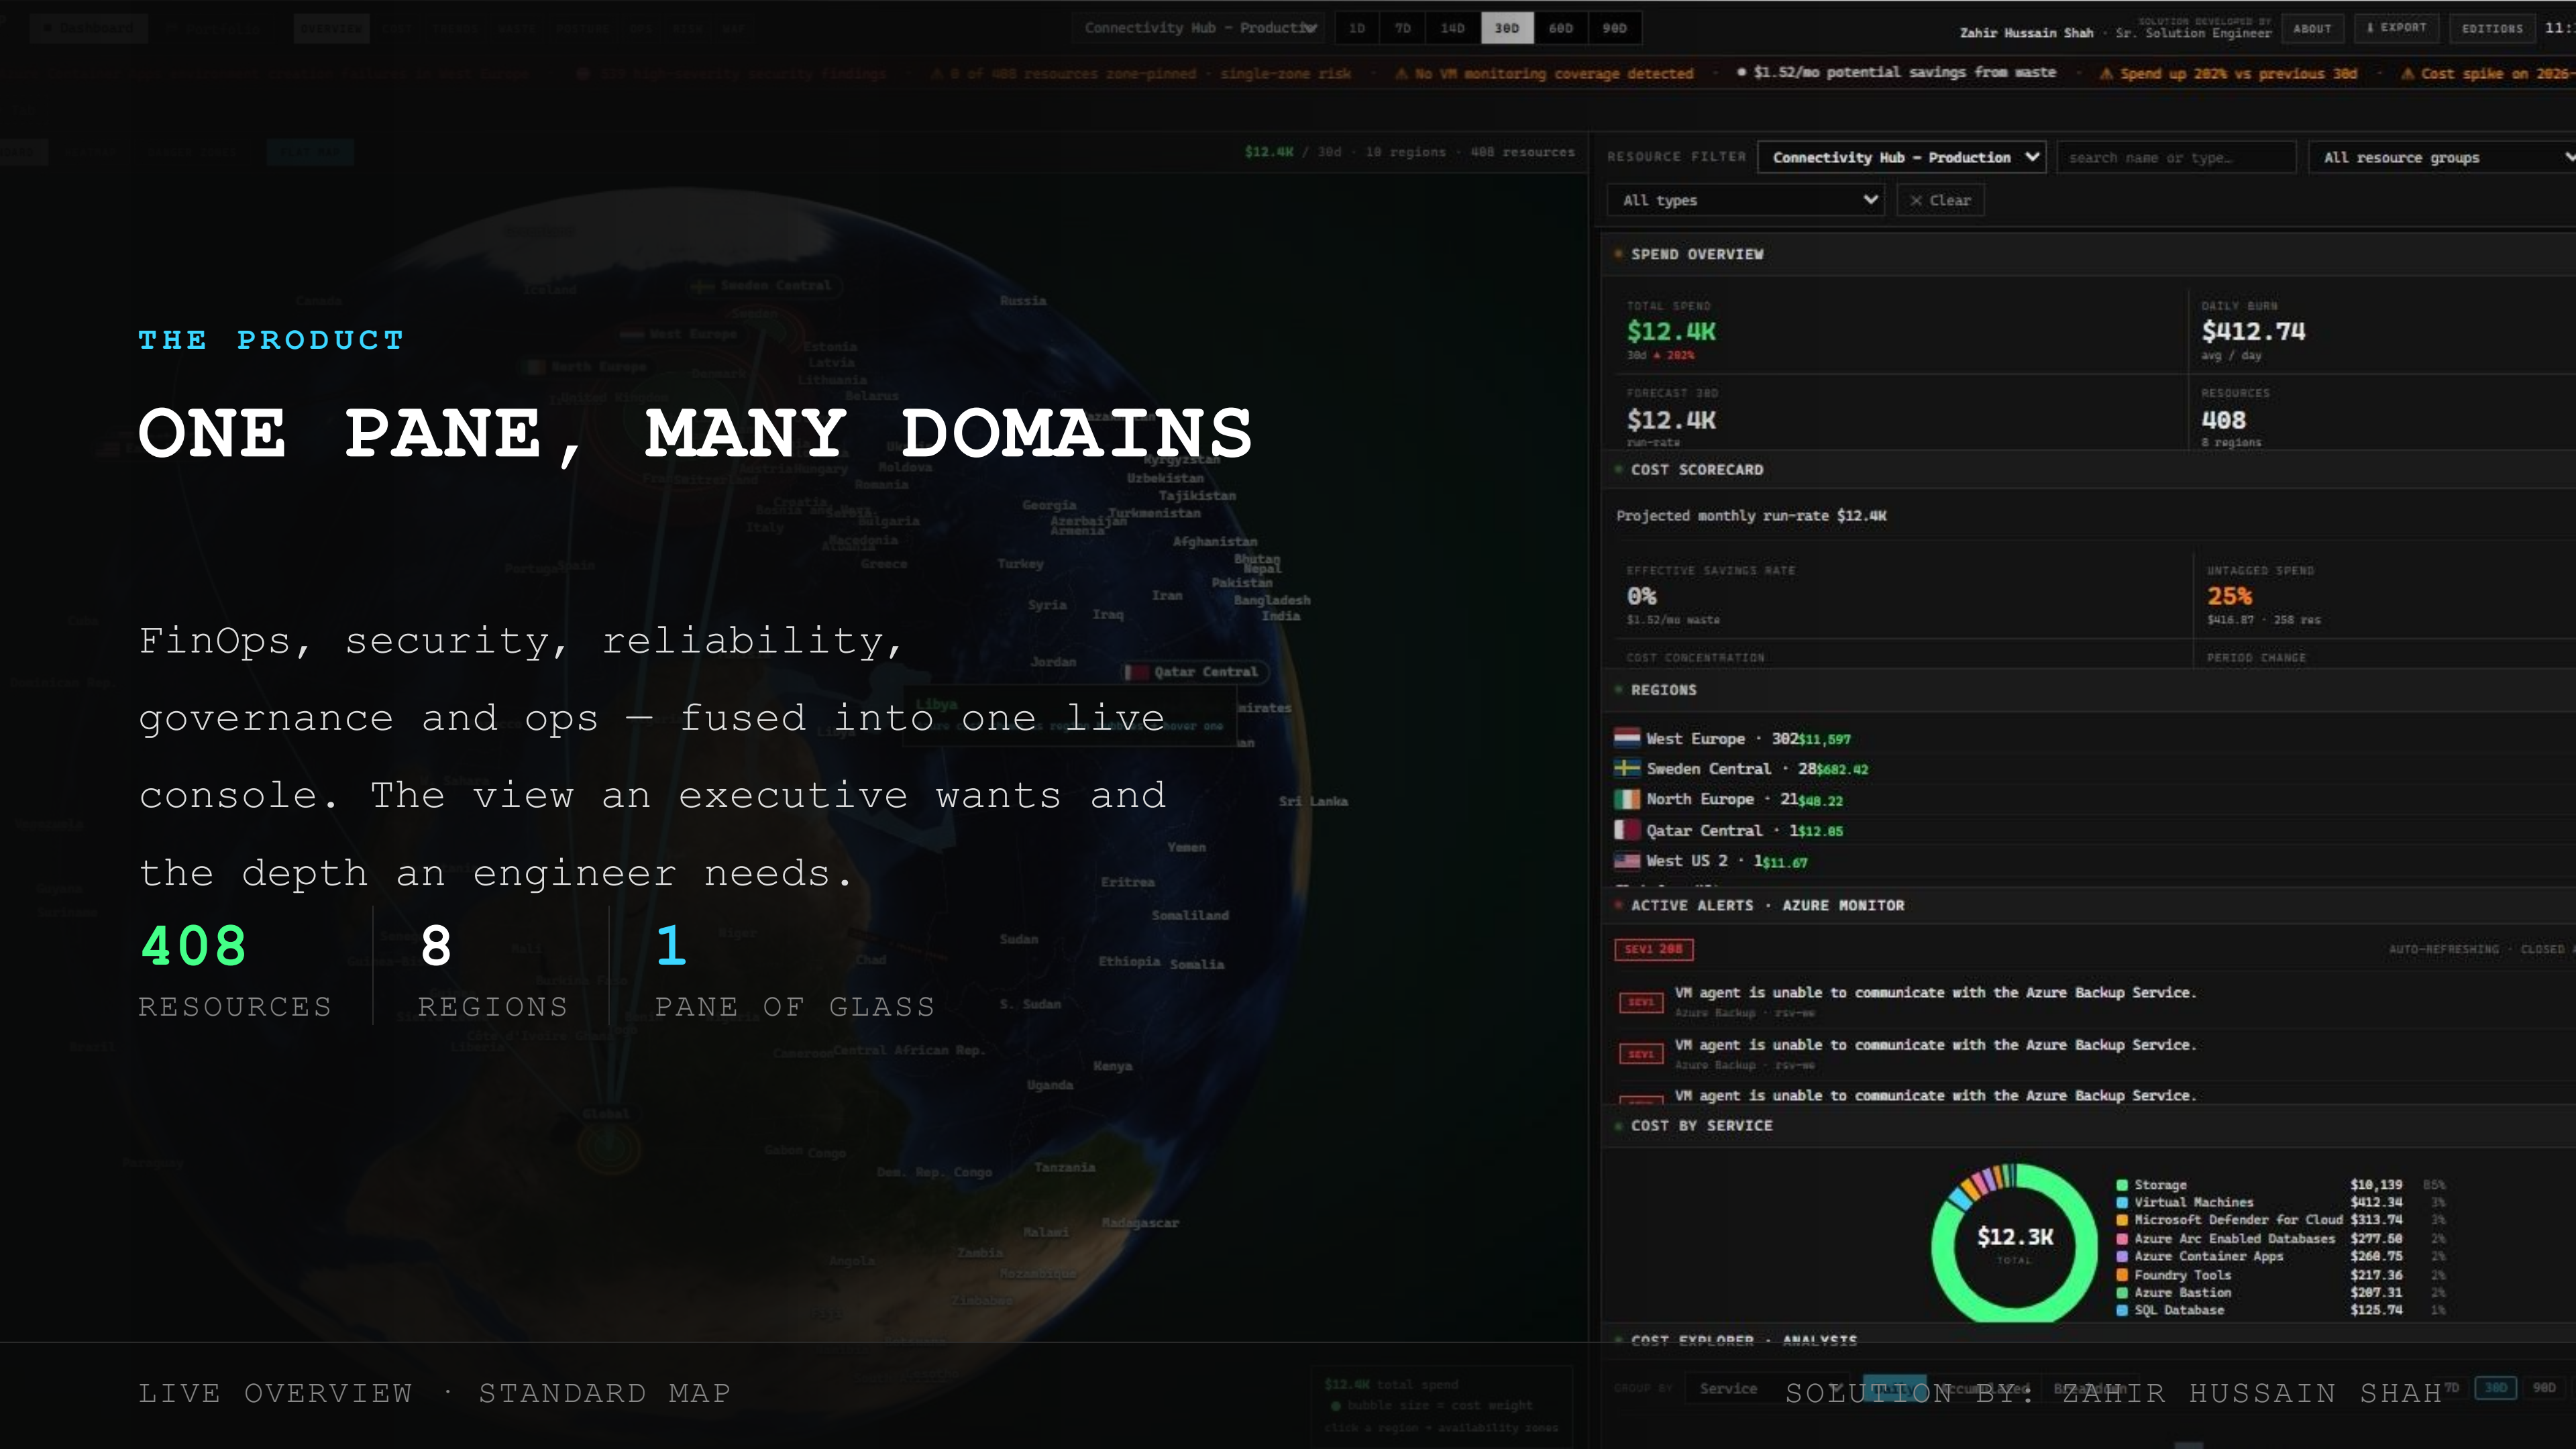

THE PROBLEM

THE SCATTERED ESTATE

Your estate is real-time – but the truth about it is split across a dozen separate blades. Each answers one question, in one tab. No single pane shows cost, risk, health and governance together.

 Cost Management ↗ separate blade	 Defender for Cloud ↗ separate blade	 Azure Monitor ↗ separate blade	 Azure Advisor ↗ separate blade
 Azure Policy ↗ separate blade	 Service Health ↗ separate blade	 Resource Graph ↗ separate blade	 Backup & Recovery ↗ separate blade

THE PRODUCT

ONE PANE, MANY DOMAINS

FinOps, security, reliability,
governance and ops – fused into one live
console. The view an executive wants and
the depth an engineer needs.
